Forme is the brand consisting
of three distinct product lines to
meet different lifestyle needs.

**Forever evolving,
since 1952.**

Forme was born as the flagship brand of Frosio Bortolo, a company of excellence with over 70 years of history in the handle industry. A family business that has maintained its cutting-edge position through integrating its production into a new design dimension.

**A legacy of knowledge,
skills, and passion.**

Thanks to its manufacturing heritage and valuable technical know-how, Forme continues to extend its production by investing in new technologies, cutting-edge machinery and valuable partnerships. We equip ourselves not just with tools, but ideas, to better interpret future trends and anticipate the needs of an increasingly sophisticated clientele.

Always looking forward.

Today, Forme stands as a strong and independent brand, with a renewed strategy and brand identity focused on contemporary architecture and the challenges of global markets. Tradition and innovation blend seamlessly to create a design in constant evolution.

Collaborations with designers from around the world, alongside prestigious design awards, reflect the identity of a brand always looking towards the future.

A logo with a secret.

Inside the lettering of the new Forme logo there is a hidden handle, created by lowering the vertical shaft of the letter “f” and detaching it from the horizontal one.

An almost secret detail, it’s a symbol that represents the idea of a discreet, exclusive design, which is revealed little by little. Attentive to what it displays as well as what it hides.

“The logo is the first building block of change. We wanted to tie ourselves to the past with the use of a lighter lower case lettering, but also firmly distinguish the new path of the brand, with additional details and added personality.”

OSMO

forme

All aspects of our DNA.

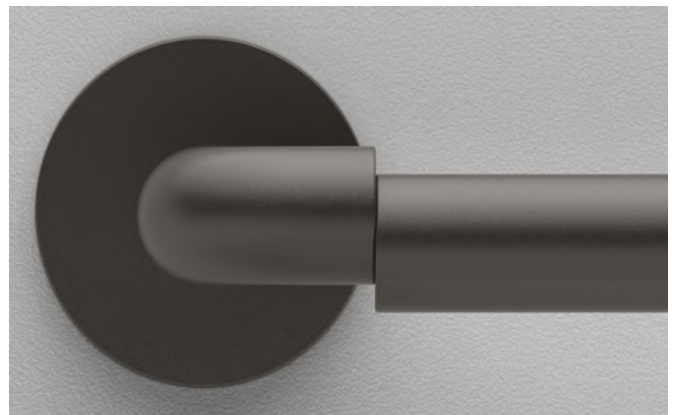

01. Endless Research.

Someone once said talent is 1% inspiration and 99% sweat. The sweat of those who study, develop, experiment with and love research in its purest form. It is what unites knowledge, seeks to always find meaning and create beauty through nourishing ideas.

02. The courage of ideas.

To innovate means to dare. Not just tolerating risk but celebrating it - investing time and resources into an idea and walking unexplored paths without knowing the destination. We believe in the curiosity to discover, day by day, what lies beyond the horizon.

03. Achieving true quality.

We are Italians who have been making handles entirely within Italy for 70 years. But this is not enough to guarantee the quality of a product.

True quality comes through a way of being, thinking and acting. It is worth more than any certification or length of history.

04. Ongoing experimentation.

Try, make mistakes, improve and try again. The success of a project arises from a process of continuous experimentation where the error is part of the journey. A wrong step can sometimes put you on the right course to create something truly unique.

05. Lateral thinking.

Nothing is created and nothing is destroyed. But everything is transformed, as long as you change your point of view. In a world where everything has already been seen and experienced, it is our unprecedented perspective that really can make the difference.

06. Return to design.

Today that the word design has almost lost its meaning, we find its essence by returning to its roots. In the collaboration with designers of different cultures and visions, in the continuous contamination, in the fusion of experiences.

07. Sustainable action.

We believe in a sustainable future and that comes through committed action, day after day. Doing, not just being.

We are lucky enough to work in a valley surrounded by greenery and we know how important it is to safeguard the beautiful planet that hosts us.

Choosing the ideal finish.

Forme handles are all made of brass or zamak - an alloy made up of zinc, aluminum, magnesium and copper. In addition to traditional finishes and special materials, two innovative finishes are available: Cleantouch[®] bacterial protection and Ecotech[®] ecological treatment. Two solutions opening the door to the future.

Materials

BRASS

ZAMAK

Cleantouch[®].

Hygiene at your fingertips.

As the pandemic continuously taught us, hands are one of the main carriers of bacteria. But Cleantouch[®], available on various Forme models, has a special antibacterial layer that protects the surface of the handle from microbes.

External tests have shown that the Cleantouch[®] treatment reduces bacterial activity by 99.9%. How? Thanks to the silver ions that penetrate the bacteria membrane, eliminating germs and limiting their reproduction.

ANTIBACTERIAL PROTECTION

Ecotech®.

Less energy, more performance.

The world is evolving. Sustainability is increasingly becoming the protagonist of corporate decisions and technology is creating new green innovations, such as Ecotech®.

Ecotech® is a special metal coating that guarantees a lower environmental impact, a healthier workplace and improvements in terms of resistance, uniformity, and bond between film, substrate and color options.

Ecotech® can be used on all Forme models. A sustainable commitment that meets the highest production quality.

Choose the Ecotech finish to give sustainable value to your projects and encourage an increasingly green production.

	Porcelain Polished Black		Porcelain Polished Beige		Porcelain Cracklé
	Porcelain Ears		Porcelain Flowers		Porcelain Curl

* Our special materials are only applied to some product families of this collection. They are not available on all product lines.

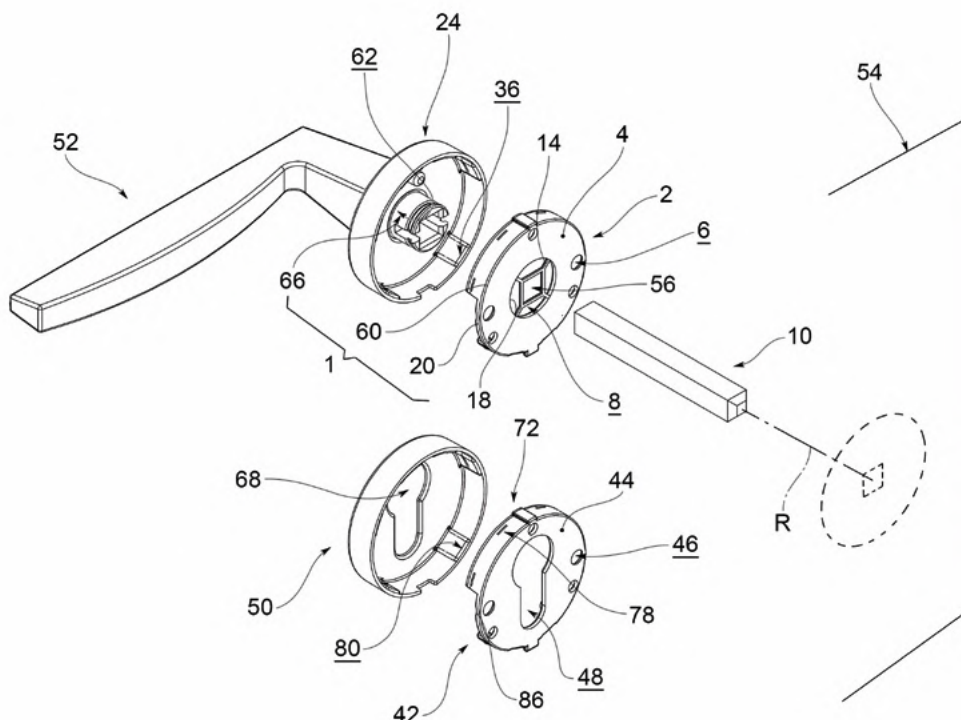

Rosettes.

Our wide range of rosettes are suitable for any need; from the more basic round and square to the most sought after designs, with a reduced thickness that almost sinks into the door.

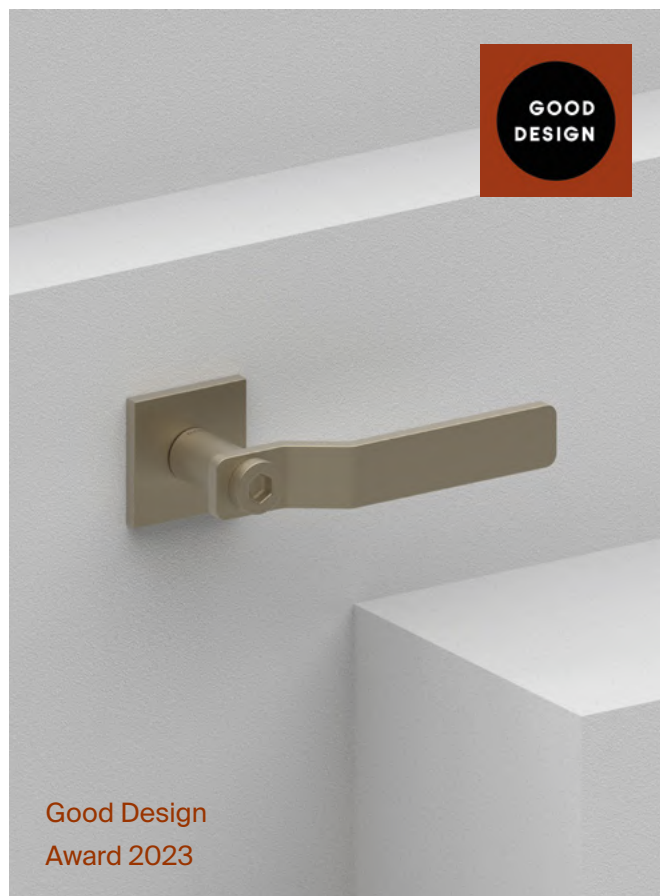

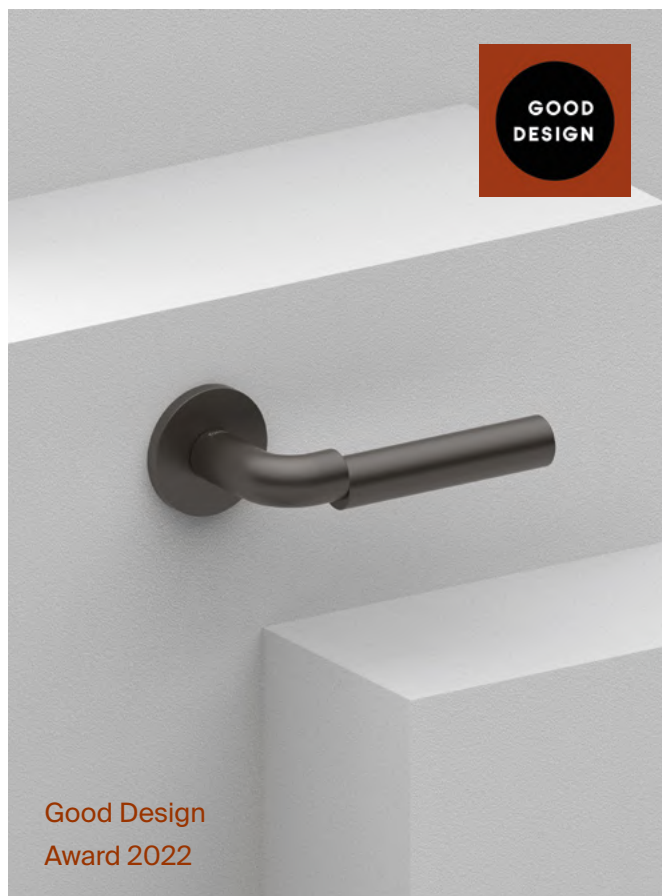

Fixa system.

Free of plastic parts and made entirely of metal, our new rosette mounting mechanism guarantees faster installation times, greater positioning accuracy and greater sealant performance over time.

This is thanks to particular mechanical devices, such as pressure locking, which makes the installation process quick and easy; the self-centering system of the panel, which guarantees the correct positioning of the rosette during assembly; and the presence of guide grooves, which ensure the stability and immovability of the rosette once installed.

Awards.

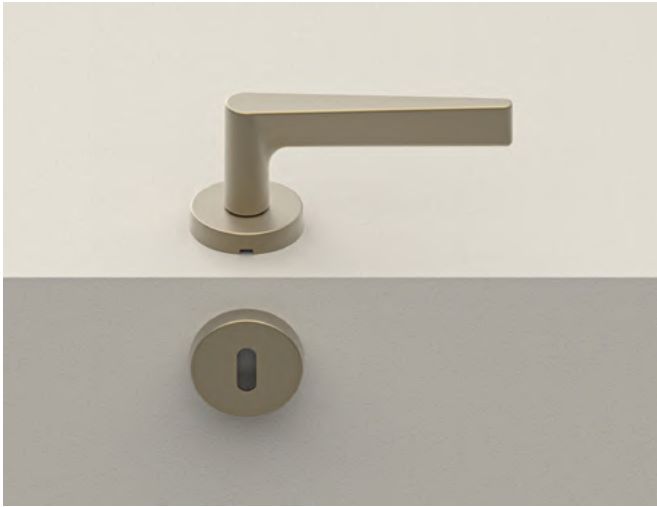

The Shinobi door handle and Gas door handle, designed by the strategy and design studio OSMO, has received the Good Design Award – a prestigious international industrial design award organized every year by the Chicago Athenaeum Museum of Architecture and Design – in the “Hardware” category.

The award received is particularly significant if we consider that in this latest edition a record number of applications were sent from over 50 countries.

Contemporary is the product line that follows the latest trends of contemporary architecture by reinterpreting them through new languages and shapes. We pride ourselves on being at the forefront, changing perspective, and experimenting.

Rosettes

Fixa Round - RFT

Round rosette with a diameter of 50 mm and a height of 10 mm, with a patented fixing system entirely in metal alloy.

Fixa Square - RFQ

Square rosette 50x50 mm and height 10 mm, with patented fixing system entirely in metal alloy.

Slim Round - RST

Round rosette with a diameter of 50 mm and a height of 5 mm, with under-rosette entirely in metal alloy, with built-in spring.

Slim Square - RSQ

Square rosette 50x50 mm and height 5 mm, with under-rosette entirely in metal alloy, with built-in spring.

Rosettes

Minimal Round - RMT

Round rosette in metal alloy with minimal bulk, which almost disappears in the door.

Minimal Square - RMQ

Small square rosette in metal alloy, which almost disappears in the door.

Fixa Icon - RIC

Rectangular rosette 50x35 mm and height 10 mm, with patented fixing system entirely in metal alloy.

Dk Rosettes

Rectangular Dk - RRD

Rectangular rosette for DK 30x65 mm, with 4 clicks iron movement.

Oval Dk - ROD

Oval rosette for DK available in two versions: 30x65 mm with 4 click movement in iron and 28x64 mm with 4 click movement in plastic.
